Introduction

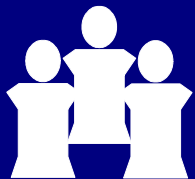

Who we are and what we stand for

Since its founding, Basic Technologies Company has established a distinctive presence across a diverse range of activities. We are a dynamic and professionally managed organization with business interests throughout the Kingdom of Saudi Arabia in the fields of contracting, construction and engineering.

Our philosophy is to efficiently market our services with uncompromising quality in order to sustain long-term relationships with our suppliers, customers and end-users. We have consistently succeeded in fulfilling our commitment to ourselves and our clients by providing and maintaining the highest standards.

We ensure that every product and service we deliver reflects reliability and craftsmanship. Our activities are certified for their quality and performance offering our customers total peace of mind.

We are proficient in handling projects of varying complexity and scale, backed by our technical and logistics divisions, delivering within set budgets and construction programmes to full client satisfaction.

WE REMAIN

Basic Technologies Company

A dedicated contracting organization specializing in building contracting, access roads, trench excavation, earthworks, maintenance and operation with an unwavering administrative continuity.

Mission & Vision

Our purpose and our direction

We believe purpose drives performance. Every project we take on is guided by a clear mission and a long-horizon vision that shapes how we serve our clients, develop our people and contribute to the Kingdom's built environment.

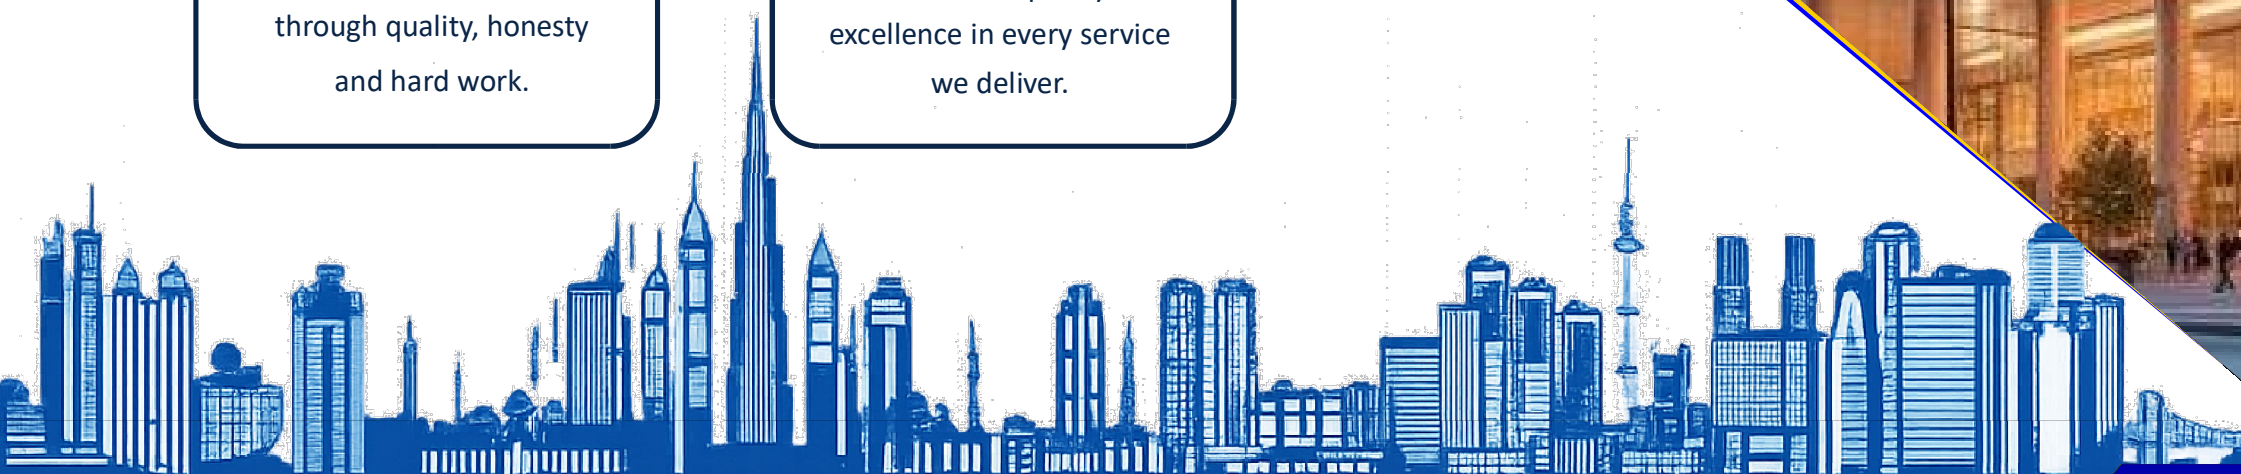

MISSION

Our mission is to remain reliable and efficient at the forefront of the Kingdom of Saudi Arabia's construction and rental equipment industry through quality, honesty and hard work.

VISION

To provide reliable value-added construction services through innovation and state-of-the-art equipment and manpower becoming dynamic leaders committed to quality and excellence in every service we deliver.

Company Status

Established with intent, engineered for scale

Basic Technologies Company was founded as a formally recognized establishment with a stable and continuous management structure providing our clients with the reliability and accountability they expect from an experienced construction partner.

Our Work Experience

- Multi-disciplinary engineering, construction and maintenance projects for government departments and the private sector.
- Land transport and construction across the Kingdom, including building maintenance and civil construction.
- Excavation, backfilling and road works with proven execution track record.
- Heavy equipment rental and skilled employment services.
- Permits, receivers, safety officers and site monitoring services for large-scale projects.

Expertise & Team

The people behind every project

Our strength lies in a deeply experienced multi-disciplinary team combining seasoned management, certified engineers, licensed operators and safety-first field crews. Together they deliver projects with technical precision and on-site discipline.

Services

Full-spectrum engineering and construction solutions

Basic Technologies Company is a leading Mechanical Engineering and Construction Project Management company operating in the Kingdom of Saudi Arabia combining smart industrial practice with disciplined management to deliver modern, unmatched solutions for the region's development.

We proudly distinguish our services by the breadth of solutions we offer to our customers. We deploy cutting-edge technology and a deep combination of skills to solve complex engineering problems, and we are trusted for our quality, reliability and commitment from project start to completion.

01 Contracting	02 Construction	03 Engineering
04 Equipment Rental	05 Manpower Supply	06 Project management

Civil Engineering

Ground-up capability for demanding sites

From earthworks to wellhead preparation, our civil engineering practice combines the right equipment, the right people and hard-won field experience executed to Saudi Aramco standards where required.

01

EXCAVATION

We have the full complement of excavation equipment and the experience to execute all classes of excavation and rock cutting.

02

SAND BEDDING, BACKFILLING & BERM

Executed per SAES-L engineering standards for on-land and near-shore pipeline construction, aligned to Saudi Aramco piping standards.

03

SITE PREPARATION & WELLHEAD

Extensive experience preparing sites in accordance with Saudi Aramco specifications and QA/QC protocols.

04

ACCESS ROADS

We construct pipeline access roads with Marl to allow safe passage of vehicles and flow lines reaching Aramco premises.

Electrical, Instrumentation & Manpower

Specialist electrical services and a deep talent bench

Basic Technologies Company is a recognized world-class provider of electrical and instrumentation services. We meet the exacting expectations and commitments required to complete technically challenging projects across the Kingdom.

Our innovative, specialized electrical services incorporate highly skilled solutions for every aspect of electrical and instrumentation projects and hazardous-area installations from construction verification, quality assurance and completions (handover and turnover) through pre-commissioning, energizing and operations & maintenance.

Transport & Rental Equipment

One of the strongest fleets in the region

Basic Technologies Company is one of the strongest players in the industry. To serve the diverse requirements of industrial and pipeline contracting, we have built up a wide-ranging fleet of heavy construction equipment.

Our product line covers everything from small handheld tools to major earthmoving machinery. Having a wide variety of tools and equipment matters but making sure every unit is operating flawlessly matters more.

We understand that our fleet is the cornerstone of our business, and we stand behind the equipment we rent. We start by purchasing factory-new equipment from the industry's leading manufacturers, then wrap each unit in a rigorously scheduled maintenance package so our clients' project execution is never put at risk.

Health, Safety & Environment

Non-negotiable at every level

Safety is embedded in every decision we make from procurement and planning to daily site execution. Our HSE culture is built to protect our people, our clients' assets and the communities we work in.

FULL LEGAL COMPLIANCE

It is the policy of Basic Technologies Company to comply fully with all applicable laws and regulations governing construction activities. Our safety plans are designed to protect people and property on and around every site.

BEHAVIORAL SAFETY PROGRAM

We are committed to a behavioral safety program that shifts culture at a hearts-and-minds level nurturing instinctive responses in our workforce that keep themselves and others safe.

MEASURED OUTCOMES

We hold ourselves to smart targets shared across the entire company. Outcomes are validated by precise measurement no exceptions.

ZERO-INCIDENT AMBITION

Our benchmark is fewer lost-time injuries and lower environmental impact leaving a positive legacy in the communities where we work. Every employee goes home safely, every evening.

FIRST-CLASS SAFETY CULTURE

We are committed to a first-class safety culture and the total prevention of accidents, injuries and ill health not only for our own people, but for our suppliers and sub-contractors as well.

Conclusion

Partnership built to last

The team at Basic Technologies Company continually seeks to contribute to the success of our customers' business and profitability to be the industry leader in construction and rental equipment through efficiency, integrity, skill, service, value, innovation and hard work.

We are committed to providing the high-quality, cost-efficient environment that helps our people thrive and lets us be good neighbors in our communities through respect for the environment and involvement with local issues.

Basic Technologies Company provides a full range of solutions road works, earthworks, civil external works, building construction, mechanical and welding, electrical and instrumentation, parking-lot construction and heavy-equipment rental delivering exceptional service and high-quality earthmoving solutions.

Our fully bonded operation and experienced team ensure the success of any project we undertake for you.
